Pipeline

Definition

Pipeline script

Script ○

```
 1  pipeline {
 2      agent any
 3      stages {
 4          stage('Clone Repository') {
 5              steps {
 6                  // Cloning the repository from GitHub
 7                  git url: 'https://github.com/vhanumankun
 8              }
 9          }
10          stage('Set Up Python Environment') {
11              steps {
12                  // Setting up Python virtual environment
13                  bat '''
14                      python -m venv venv
15                      venv\\Scripts\\activate
16
17                  '''
18              }
```
